FEATURED PRODUCT

'TIS THE SEASON! -to hit the courts

Well here we are again. It's time to finish the courts (really all the floors). Did you know that we carry an innovative product that can save you down time, labor and overall cost with outstanding results and durability? It's called—

BCS DuraSport

Water Based Urethane Wood Finish

Dur-A-Sport is ideal for any wood floor such as Gymnasiums, Stages, Racquetball Courts, Dance Floors, Schools, Banquet Halls, Executive Offices, Health Clubs, Art Museums and Churches.

This unique single part water-based formulation dries in one hour and cures in 24 hours. The prep and application is simple and easy. Depending on conditions no screening is required reducing labor and dust.

- **A typical application requires One day-Two people-Two coats with outstanding results! Single-Component formula means no pot life and no mess**
- **Contains reactive polymers that offer durability and appearance equal or greater than oil-modified products**
- **Excellent black mark, scuff and soil resistance**
- **One hour dry time between coats under normal conditions. Only 24 hour gym down time**
- **Uniquely restorable with high speed buffer**
- **Suitable for oak, maple and parquet floors**
- **Large area coverage— up to 1,000 sq. ft. per gallon**
- **VOC-Compliant**
- **Slip-Resistant— UL classified**
- **MFMA Approved**

MICROFIBER MOP SYSTEMS Easy—cost effective

While cotton string mops might have the cheapest initial cost, other factors need to be considered when choosing the right mop head. Manufacturers are always looking for innovative methods of improving their products. Especially in efficiency and effectiveness. As new types of flooring are developed technical developments are also ongoing in the fabrics used as mop fibers.

Traditional **cotton mops** can provide a cost effective cleaning method when used in the right situations. However many times they are **not always the appropriate or economical choice.**

Microfiber mops are quickly becoming the mop system of choice. They are super absorbent and can clean deeper into the pores of a surface. A key benefit to microfiber mops is that they are lighter than regular string mops and require less water and time allowing the floor to dry faster. They have the ability to clean better and provide a longer life. Which helps reduce expense over time. Also, a microfiber mop system is typically easier to use and causes less strain on your body.

Many healthcare facilities are leading the way in the use of microfiber as they focus on reducing the potential for MRSA and other infections. Microfiber mops can be easily used, quickly changed and laundered to help prevent outbreaks.

Ask us if a **microfiber mop system** would be appropriate for your facility!

**Success is simple.
Do what's right, the right way,
at the right time.**
